

## Soccer ball and the sun

I wish

My soccer ball were like the sun  
A friend during study and a friend during fun  
As the sun is so resourceful  
It wipes the darkness and spreads the light  
So that I can go to school  
With books as my weapon against illiteracy to fight  
And make myself able to find wrong and right  
I read, I write, I talk to learn  
And learning new things are so much fun  
Like playing soccer in a sunny day  
With soccer ball in feet and ample leisure to play

If the sun could be a soccer ball  
The rotation and rolling making it a charged ball  
Using the very charge to make darkness fall  
I could change the darkness of my room into my study hall  
Using my soccer ball, the darkness of the night gone  
I would have all of my homework done  
Complete my dream to be a learned man  
To fight against darkness and cure all the human pain

Oh! Reading books at night would be so fun  
If my soccer ball were like the sun!!
